Keep it clean

No mess, no stress

About ICB

ICB is the innovative producer of NoStik® products, a brand that offers a guarantee of quality and innovation. NoStik® represents a wide range of non-stick products, such as reusable baking and protective sheets, shelves, trays & bags. To the consumer, NoStik® represents quality and innovation and it is the reference in the consumer market when it comes to non-stick applications.

Since 1990 our products are manufactured proudly in Belgium. Our unique fully automatic production facility allows us to control quality in all stages of the production process. We can guarantee our clients short lead times thanks to our stock holding capacity in our 4000m² large warehouse.

NoStik® Goals

Fat Free Cooking

Thanks to their non-stick properties our products don't require added butter, oil or cooking fat during the cooking process. Therefore our products are a handy help for consumers who want to start up or continue a diet or who just want to maintain a healthy lifestyle.

Products symbolizing this goal are, for example, the NoStik® Bake Liner, Pan liner, Crisper Baskets, Cake Tin Liners, Adjustable Oven Liner & Crisper Shelves.

Reusability

Several products manufactured by NoStik® are a reusable alternative for disposable products such as parchment paper, wax paper, aluminum foil and trays. Therefore our products are a handy help for consumers who want to save money and help to reduce waste.

Products symbolizing this goal are the NoStik® Bake Liner, BBQ Liner, BBQ Trays, Oven Liner and Freezer Bags.

Keep it Clean

Several products manufactured by NoStik® are made to keep your cooking appliances clean. Avoiding mess in your kitchen reducing time needed to clean after cooking.

Products symbolizing this goal are the NoStik® Bake Liner, BBQ Liner, BBQ trays, Oven Liner, Gas Range Protectors, Deep Fry Filter and Toast Bags

NoStik® Materials

All products manufactured by NoStik® are made out of woven glass fabric coated with PTFE (Teflon™) or out of pure PTFE (Teflon™)

Woven glass fabric is made by interweaving threads crosswise (Weft) and threads lengthwise (warps). Interweaving can be done in different ways resulting in several types of fabrics. The most visible difference in fabrics is the one between closed and open mesh fabrics. In closed fabrics a further deviation can be made between 0.07mm, 0.12mm and 0.22mm fabrics. In open mesh fabrics a deviation between 1x1mm, 2x2mm, 4x4mm and 6x6mm can be made. Each of these fabrics are used to make 1 or more of our products.

PTFE (Polytetrafluoroethylene) (Teflon™) is produced by the polymerization of tetrafluoroethylene. PTFE used to produce NoStik® products is traditionally a milky white dispersion. Key features of PTFE are its non-stick properties, chemically inertness and high heat resistance up to 260°C.

As an exclusive partner from the Chemours Company, our products are coated with Teflon™ dispersion.

NoStik® legal compliance

Our products are subject to several migration tests per year, performed by accredited third party laboratories. Therefore we can state our products are compliant with regulations such as EU legislation 1935/2004, 10/2011, LFGB, FDA and all their relevant updates. Subsequently all our products can come in contact with food and are for example free from substances such as PFOA & BPA

NoStik® packaging & merchandising

Thanks to our in house graphic department we are capable to design item packaging fast and according to the specific needs of our customers.

On outer packaging level we offer several solutions such as traditional brown outer carton, full color shelve display (PDQ), floor displays and even full pallet displays.

NoStik® Europe and overseas

Our products can be found in more than 40 countries around the globe. Out of our manufacturing and warehouse facilities in Belgium we can deliver to each continent. All products in this catalog are available in our manufacturing facilities in Belgium.

NoStik® South Africa

Nostik® is distributed exclusively by AWG Trading (PTY) Ltd in Southern Africa.
